«Krasny oktyabr Corporation» JSC is the largest manufacturer of stainless steel rolled products in Russia*

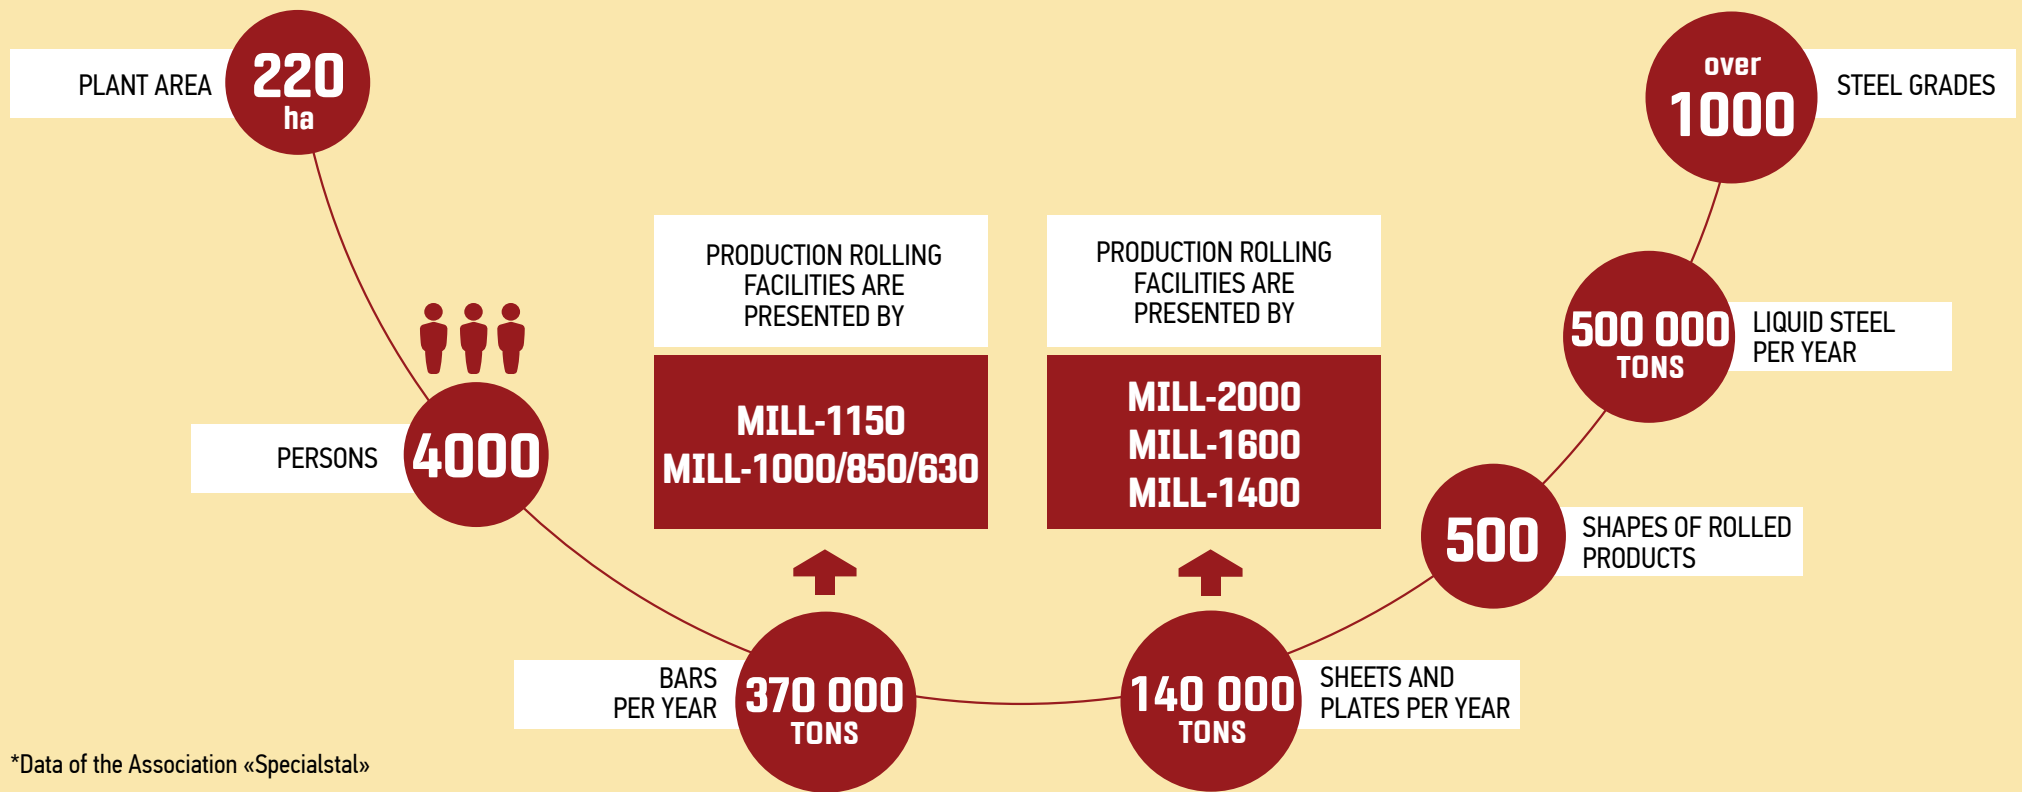

The metallurgical plant had been established in 1897 by the French joint-stock Ural-Volga Steel Company on the skirts of the town of Tsaritsyn, and in November 1898 the first open-hearth furnace has been put into operation. In the postwar period, the plant obtained its current structure and final specialization in production. The main production facilities were put into operation in the 50's – 70's.

At present time the share of «Krasny oktyabr Corporation» JSC in the all-Russian manufacturing of stainless steel rolled products is 40 %.

The plant is occupied with constantly updating equipment, purchasing new machines and units as well as improving production technologies. The considerable attention is paid to social policy issues: comfortable working conditions are created, corporate events are held, and the territory adjacent to the plant is landscaped.

Sales Directorate of «Krasny oktyabr Corporation» JSC is carried out the sales of rolled products.

1

*Data of the Association «Specialstal»

ADVANTAGES OF THE PLANT:

-  Convenient economic and geographical location of the region (M-6, M-21, P-228, P-221, A-153 federal roads; North-South transport corridor), transport accessibility (automobile, railway, river and sea transport)
-  Proximity to the following ports: Volzhsky commercial port, Kalach river port
-  Manufacture of steel grades by means of electroslag remelting
-  Heavy billet mill (where it is possible to roll the rounds from 60 to 360 mm in diameter)
-  Modern turning machines: PL-370, PL-210
-  Production of small batches (from 5 tons)
-  Check tests shop
-  Testing areas
-  Basic Technical University engage in training of personnel: Volgograd State Technical University

Applicable quality management system (QMS) is in accordance with ISO 9001:2015 international standard.

Certificate of conformity with the requirements of standards GOST R ISO 9001-2015 and GOST RV 0015-002-2020 issued by Certification Center "MONOLIT-Cert" and acceptable by Rosobornzakaz, Rosstandart and «Rosatom»State corporation

Certificate of manufacturer of materials used in construction according to the standards 305/2011/EU (EN 10088-5:2009) and 305/2011/EU (EN 10025-5:2009).

Approval certificate of manufacturer of shipbuilding steel of normal and higher strength as well as corrosion-resistant steel products

Certificate of manufacturer of materials and pressure equipment in compliance with the rules AD 2000-Merkblatt W0 and Directive 2014/68/EU.

Environmental management system (EMS) is in accordance with ISO 14001:2015 international standard.

RANGE OF PRODUCTS	SHAPE		TECHNICAL REQUIREMENTS TO THE CHEMICAL COMPOSITION AND RANGE OF PRODUCTS
	DIAMETER, MM	LENGTH, MM	
Stainless steel	GOST 5632-2014		
	65...200, unturned rounds	2400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing Requirements to the surface quality: GOST 5949 (3ГП)
	65...200, unturned rounds	2400...6000	As agreed by the parties
	70...340, turned rounds	3400...6000	
Corrosion- and heat-resistant special purpose steel	70...250, turned rounds	3400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, quenching
			As agreed by the parties for the rounds over 200 mm in diameter
			Requirements to the surface quality: GOST 5949 (2ГП, 3ГП)
Structural ball-bearing steel	GOST 801-78		
	65...250, unturned rounds	2400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing
			Requirements to the surface quality: GOST 801 (0Г, 0Х)
	70...250, turned rounds	3400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing
Requirements to the surface quality: GOST 801 (0Г, 0Х)			
Structural alloy and nickel-containing steel	GOST 4543-2016		
	65...250, unturned rounds	2400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing
			Requirements to the surface quality: GOST 5949 (2ГП, 3ГП)
	70...340, turned rounds	3400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing. TU 14-1-2118-98 is applicable for the rounds of 250 mm and over in diameter
			Requirements to the surface quality: GOST 4543 (1ГП, 2ГП, 3ГП)
	GOST 20072-74		
	65...200, unturned rounds	2400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing
Requirements to the surface quality: GOST 20072 (subgroup a and б)			
70...200, turned rounds	3400...6000	Requirements to the geometry: GOST 2590 (B1), hot rolled bars, annealing	
		Requirements to the surface quality: GOST 20072 (subgroup a and б)

FORGING HAMMER PRODUCTION

At forging hammer shop it is possible to manufacture the round billets using forging hammers.

STEEL GRADES TO BE USED

RANGE OF PRODUCTS	STEEL GRADES
Low-alloy steel	09Г2С
	S355J2
Structural carbon steel	20-45
	C45E
Structural alloy steel	20X-40X
	20-30XГСА
	15XM
	16-20MnCrS5
	14-20MΠCГ5
	42CrMoS4
Nickel-containing alloy steel	12XH2
	20X2H4A
	0XH1M
	0XH3M
	30X2MЮA
	45XH2MΦ
	34CrNiMo6
	17NiCrMoS6-4
	18CrNiMo7-6
	00CrNiMo0
	39NiCrMo3
Stainless steel	30X13
	14X17H2
	12X18H9T
	304/1.4301

PACKING AND MARKING

Rolled products are packed and marked in accordance with the requirements of standards and specifications as well as orders and contracts.

DEPENDING ON THE TYPE OF ROLLED PRODUCTS THE SHAPE OF BUNDLE OR PACKAGE MAY BE AS:

round;
triangle;
rectangle.

EACH BUNDLE OR PACKAGE IS SECURED WITH:

steel strip (for sheets and plates);
wire of 6–7 mm in diameter (for bars);
two-sided strapping with corrosion-resistant packing band using two synthetic ropes (for ground rolled products).

PRESERVATION:

liquid preservation composition based on industrial oil with addition of inhibitors.

PACKING:

wrapping with water-repellent paper or polyethylene film;
each sheet or plate is laid using package liners.

- with wire strapping every 2-3 metres;
- with laying of polyethylene film under strapping for stainless steel products.

Two labels with the following information are attached to each bundle or package of bars, sheets and plates intended for export:

RED OCTOBER	Krasny oktyabr
RUSSIA	Russia
C №	contract number
COUNTRY	country of destination
SIZE	dimensions
GRADE	steel grade
HEAT	heat number
LOT	lot (specification) number
PIECES	number
WEIGHT/MT	weight in metric tons (kilograms).

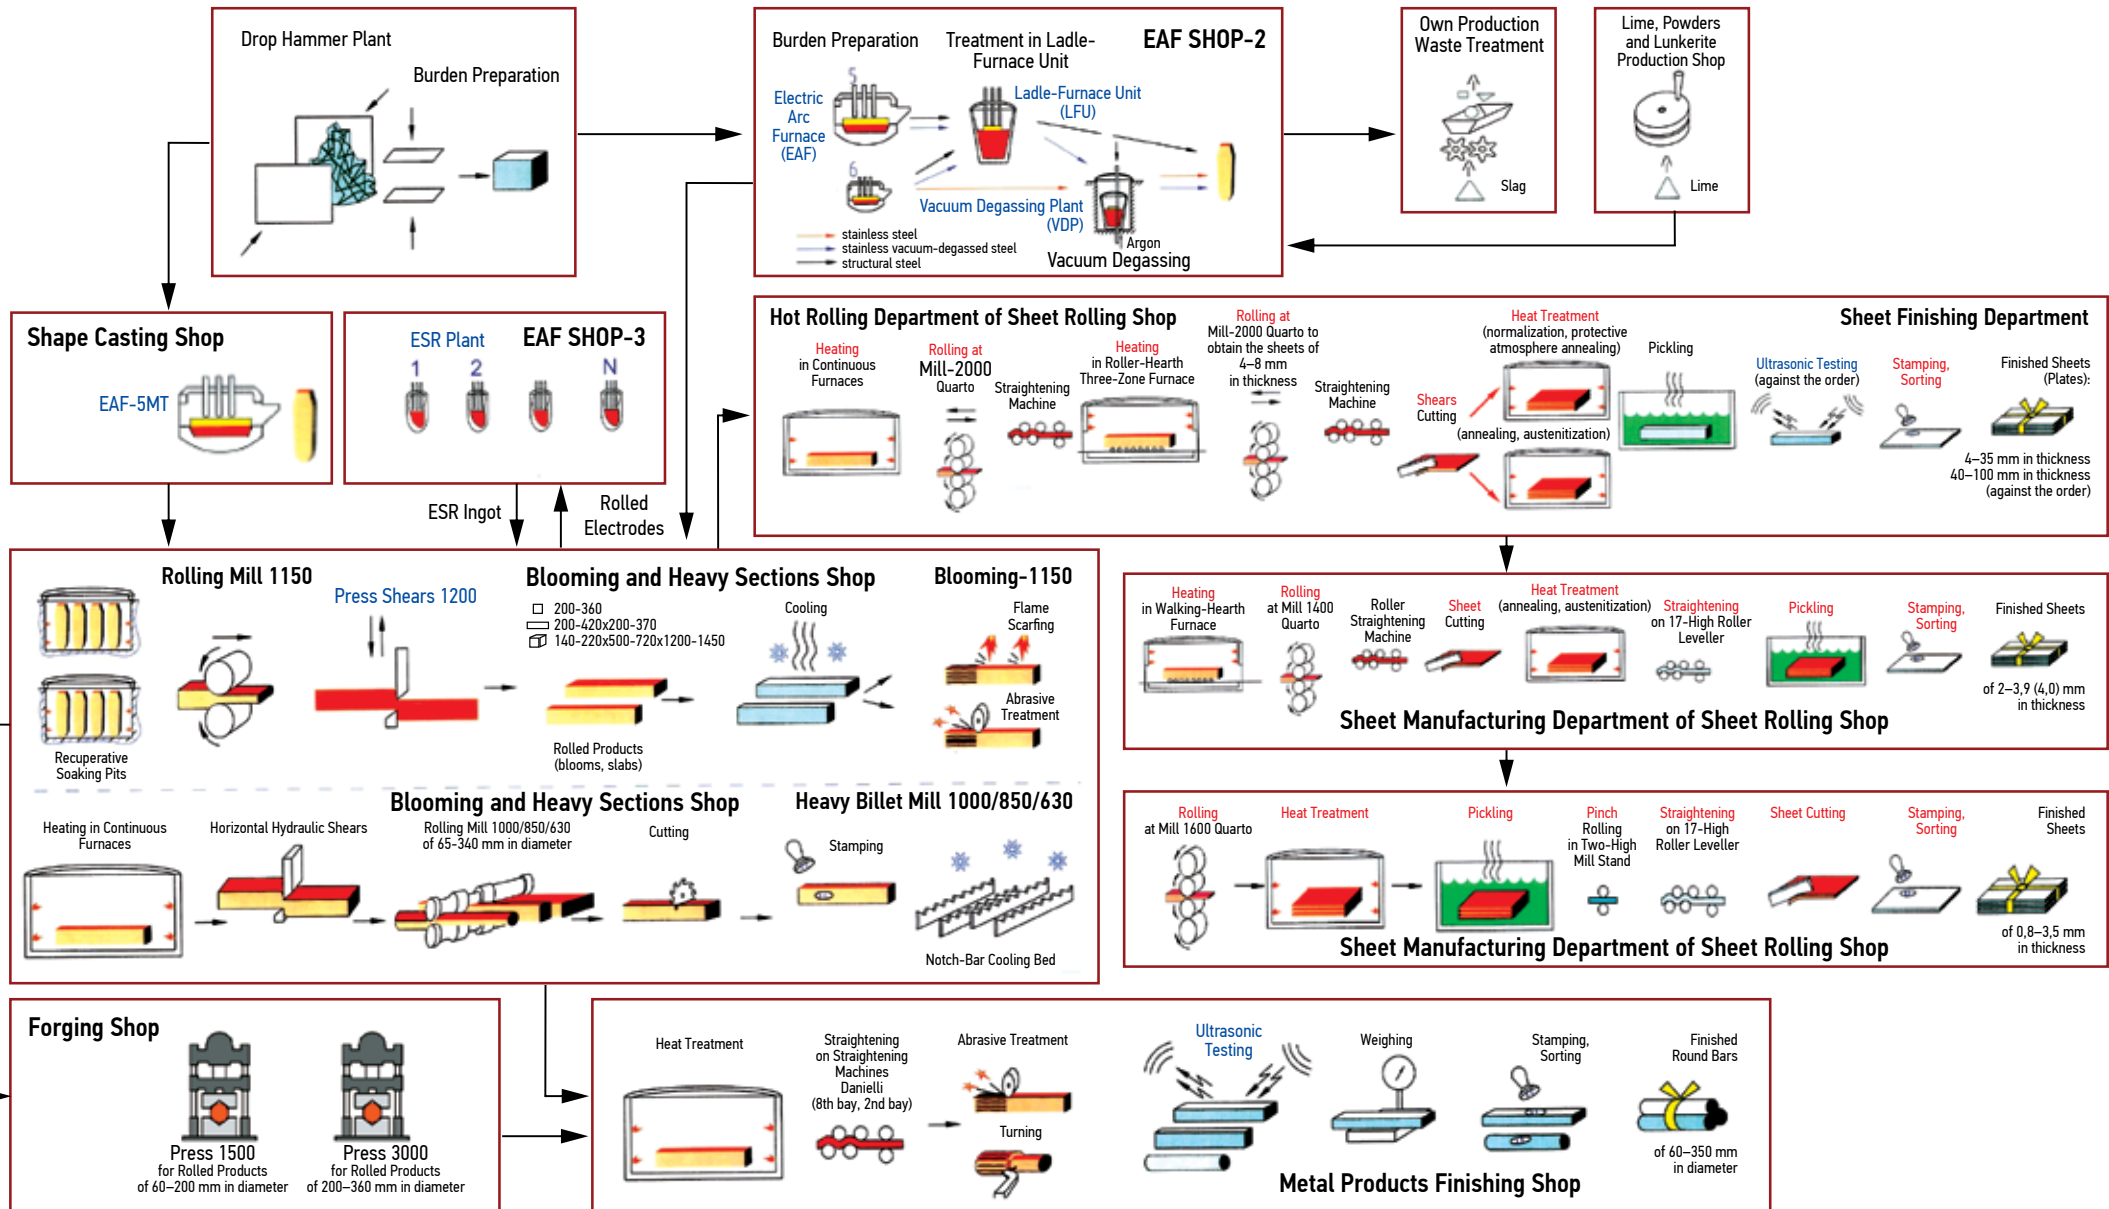

By the customer's request the rolled products may be manufactured according to the requirements other than the applicable standards and specifications or in addition to them as follows:

- restricted limits for carbon and alloying elements;
 - setting limits for hardness, mechanical properties, non-metallic inclusions and other characteristics not specified in the standards and specifications;
 - pickling of sheets and plates;
 - ultrasonic testing of internal defects for the turned round bars as well as sheets and plates clean from scale together with the examination of properties according to the procedures of international standards:
- | | |
|--|----------------------|
| grain size | ASTME112; |
| non-metallic inclusions | ASTM E45 (method A); |
| macrostructure | ASTM E381; |
| ultrasonic testing of internal defects | SEP 1921 |
- and etc..

Special requirements are drawn up by technical agreements or specifications agreed on the basis of technical protocol when concluding the contract. As agreed with the customer the rounds of 70–340 mm in diameter may be supplied after grinding up to the surface roughness $Ra \leq 6,3 \mu\text{m}$.

By the customer's request the rolled products may be supplied in heat treated condition (after tempering, annealing, normalization, quenching + tempering).
